# Quote System Use Case

# Actor Dictionary

Actor	Description	Use Case(s)
Sales Associate	The Sales Associate can login to the associate logs in, (s)he can then enter sales quotes for customers. They can then convert a quote into a purchase order.	Create a quote, sanction a quote, Create a purchase order
Admin	Using the administrative interface, the admin can maintain sales associate and quote information. They can view, add, edit and delete sales associate records. The admin can also search and view quotes based on status (finalized, sanctioned, ordered), date range, sales associate, and customer.	Create a purchase order
Legacy Database	The legacy database is a list of existing customers with customer name, address, and contact info that can be used for a quote	Create a quote
Processing system	A purchase order is sent to a processing system which answers with a processing date and sales commission rate for the sales associate	Administer system

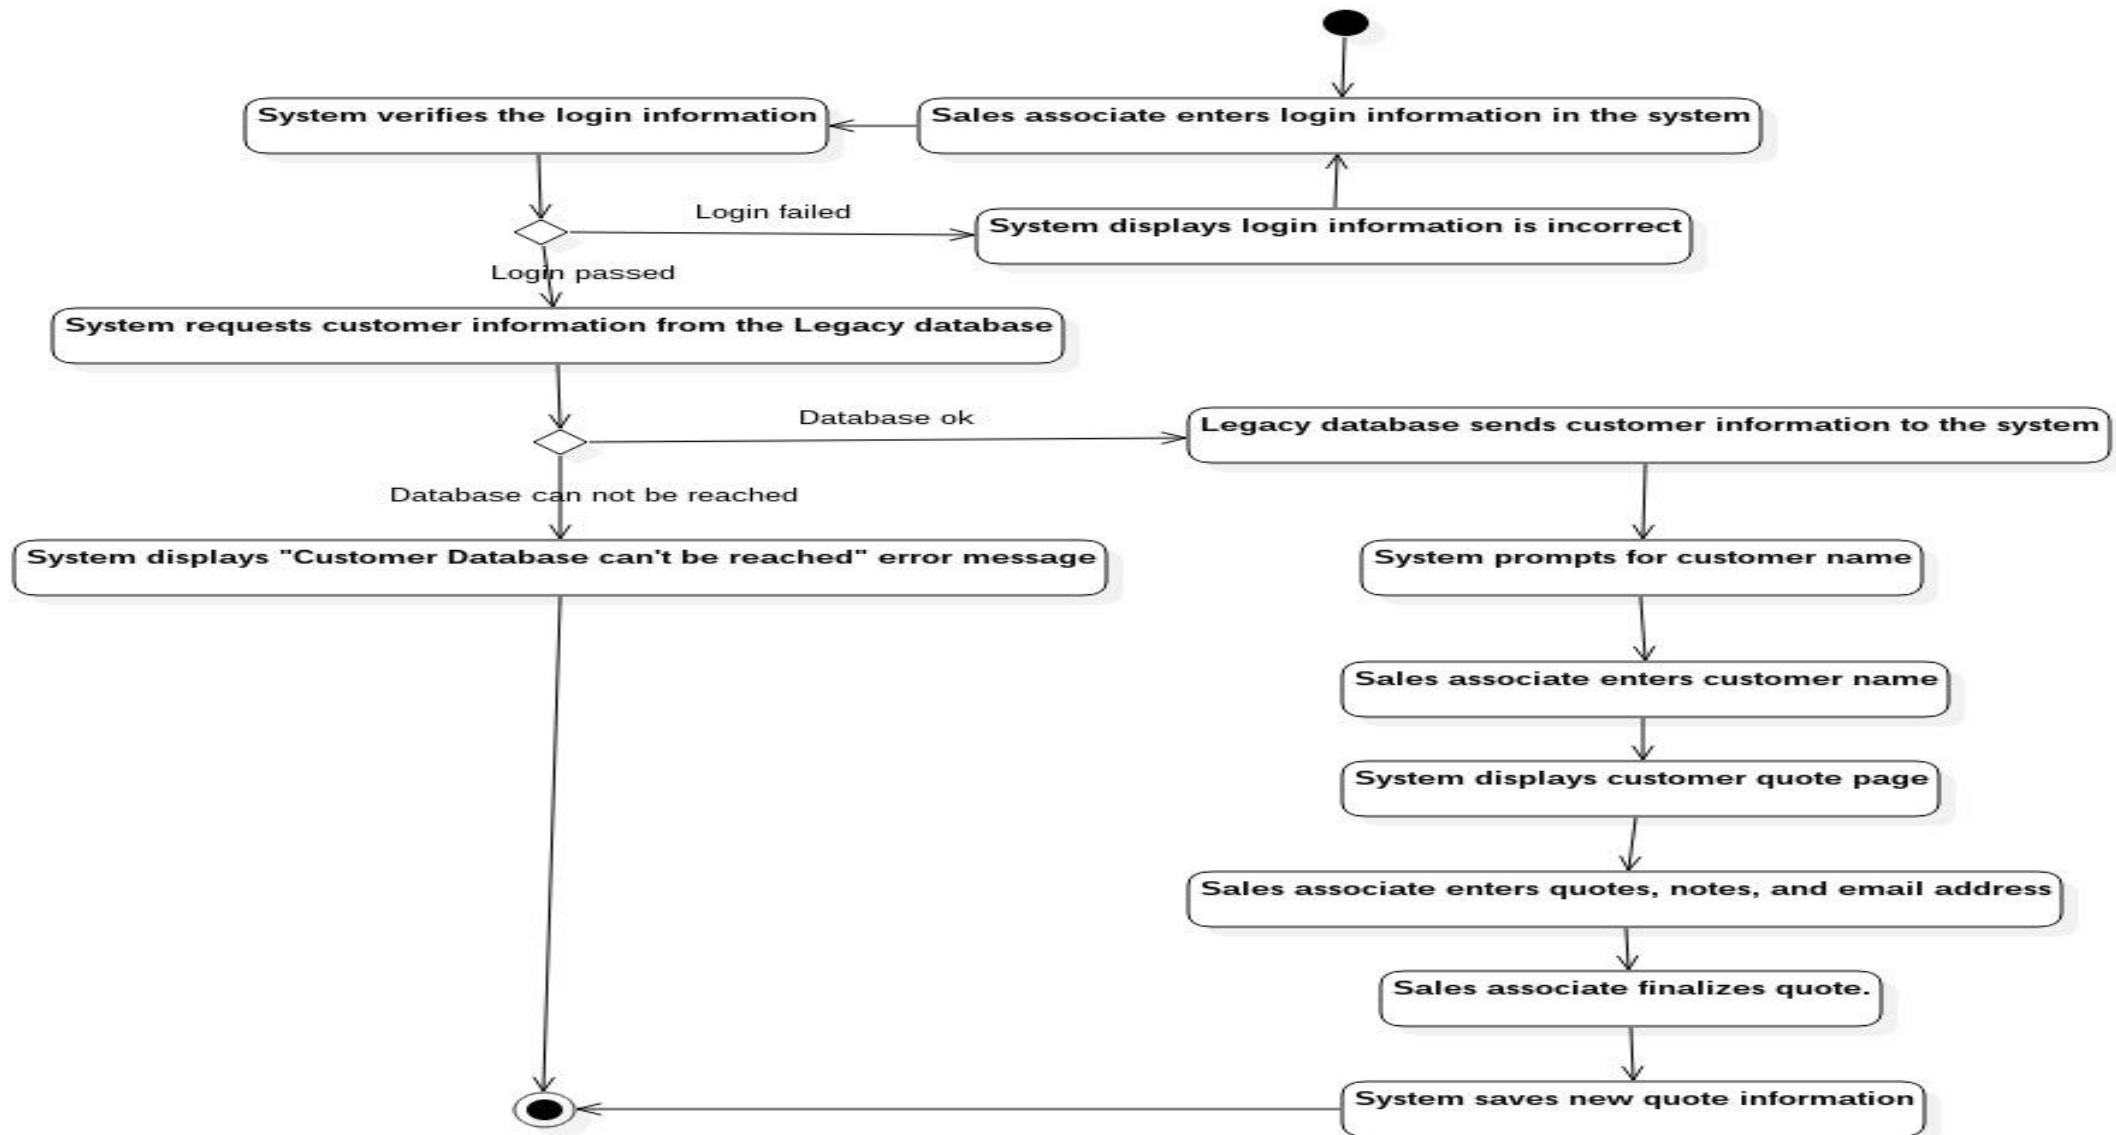

# Quote System Use Case

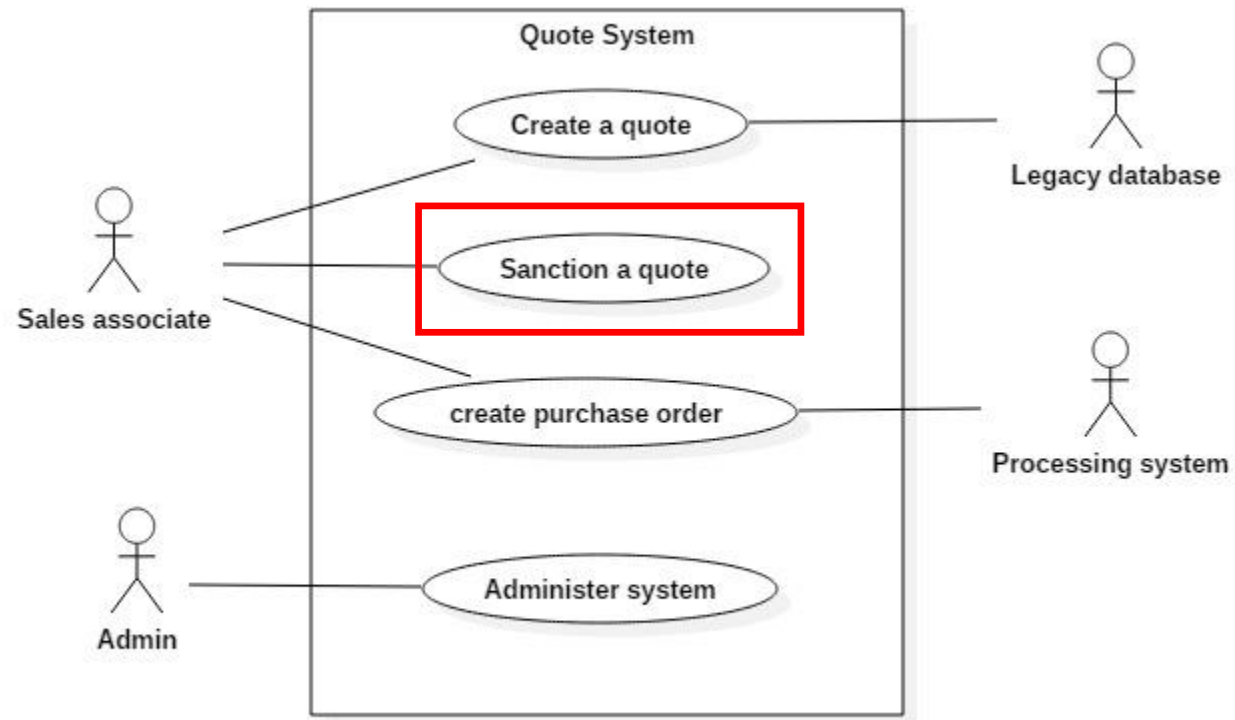

# Create a Quote Specifications

Name	Create a quote
id	1
Scope	Quote System
Priority	High
Summary	After the associate logs in (s)he can enter sales quotes for customers. Quotes are entered for existing customers, their information is maintained in a company legacy database with customer name, address, and contact info. A quote consists of multiple line items. Each line item has a free form description and a price. The associate can also attach secret notes of free form text. The quote is entered into a new quote database. The associate also attaches a customer e-mail address to the quote, which is used as e-mail destination for communication as the quote is processed. The associate can edit quotes until (s)he finalizes the quote.
Primary Actor	Sales associate
Supporting Actor(s)	Legacy database
Stakeholders	N/A
Generalization	N/A
Include	N/A
Extend	N/A
Precondition	N/A
